

Object test case of Sending OTP

I'm using the Surokkha website to download the Vaccine card

Link: <https://surokkha.gov.bd/vaccine-card>

1ST Select the identification option from the menu to download the vaccine card, like selecting the National ID Card

1. Check the required field for sending OTP
2. Check the verify button
3. Check that an instruction message will show
4. Check that the OTP field will generate
5. Check the OTP Length
6. Check that there will be a time limit
7. Check that OTP will be sent to your given PHONE or mail
8. Check the mobile phone if any message is sent or not
9. Check the OTP number is random
10. Check that after the time limit user can resend the OTP again
11. Check that the same OTP can be used multiple times or not
12. Check that Enter the valid OTP, vaccine card can be downloaded
13. Check that ENTER the invalid a warning message will pop up
